There is a name – one name – that stands for so much of what Australians want in a car. Ford Laser. The car that started it all. Comfort. Performance. Reliability. Value. All in a good looking, right-size package. Laser is very big on the feel good factor too – that feeling of confidence and real satisfaction you get every time you drive. So we'll put it to you right now: if you're about to put your faith – and your money – into a car, it should be this car. The very latest Ford Laser. All those original qualities, but in an up-to-the-minute edition that's as fresh as . . . well, come and take a look for yourself right now. . .

LASER GLXi HATCH

LASER GLXi SEDAN

LASER GLXi HATCH & SEDAN

Ford Laser GLXi introduces you to top-of-the-line performance, comfort and appointments. And top value too when you compare Laser with competitive offerings. Choose versatile 5-door GLXi hatch or 4-door GLXi sedan, both equipped with a strong and powerful 1.8 litre EFI engine. Teamed with the standard 5-speed manual transmission or optional 4-speed automatic, this responsive engine makes Laser GLXi an impressively quick and agile mover around town or out on the open road. Laser GLXi stops with the authority of efficient 4-wheel power disc brakes.

SEDAN

LASER LXi SEDAN

Never before has so much style, so much room and so many desirable features come at such an affordable price. Laser LXi sedan gives you a spirited and economical 1.6

litre fuel injected engine with power steering, front disc brakes and 5-speed manual or optional 4-speed auto transmission. For comfort and convenience there's a 4-speaker stereo radio cassette, intermittent windscreen wiper control, adjustable steering column, cloth seats, comprehensive instruments including tachometer and more.

Shown with optional driver airbag.*

LASER LXi HATCH

Everything you've just read about the Laser LXi sedan also applies to the LXi hatch. So it really comes down to whether you prefer a hatchback or a sedan. While both the sedan and hatch have a split-fold rear seat, the hatch offers taller, more versatile carrying space by virtue of its removable parcel shelf. The hatch, of course, has a rear wiper/washer. And both models have thoughtful inclusions – like warning chimes that sound if you've left the key in the ignition or the headlamps switched on, map pockets in the front doors and ignition lock illumination. For proven performance, comprehensive standard equipment and unbeatable value for money, a Laser LXi hatch or sedan is the way to go.

GLXi

LASER: THE INSIDE STORY

The Laser driving experience is very big on room and comfort. And features. Like tilt adjustable steering column; intermittent windscreen wipers; stylish seat fabrics; and great sounding stereo radio/cassette. The GLXi also gives you a height and tilt adjustable driver's seat and the option of the Power Pack comprising power windows and door locks, power mirrors, map reading spot lamps, front door courtesy lamps and illuminated entry.

ENGINEERING

Laser LXi's 1.6 L DOHC engine develops 80 kW.

Laser GLXi's 1.8 L DOHC engine develops 92 kW.

Is getting there half the fun? In a Laser it is – absolutely! And some of the thanks for that must go to what you'll find under the bonnet. The four-cylinder Laser engines are responsive and fuel efficient – the result of sophisticated engine management systems that meter and deliver fuel with computer precision. Whether you choose the standard 5-speed manual transmission for a more spirited style of driving, or the convenience of the optional 4-speed auto, the power train combinations are equally rewarding. The versatile 4-speed auto in today's Laser is an amazingly smooth changing unit. And it's smart. As conditions change, the electronic control system adapts to compensate. The result: consistently smooth gear changes year in, year out.

Laser's responsive engine, precise steering and efficient braking systems help the driver to avoid an accident. Numerous passive safety measures provide a high level of protection in the event of one. Laser's impressive structural rigidity is enhanced by side intrusion beams in the doors. Anti-submarine front seats help prevent occupants from sliding down under seat belts in the event of a sudden stop. And seat belt web grabbers and height adjustable front seat belt pivot points provide added safety. An optional driver airbag is available on all models, and on the GLXi an optional passenger airbag is offered as well.
